A Guiding Light in Sterilization Packaging Solutions

ISO 13485 Certified

Beacon Converters, Inc. – Specialists in Flexible Sterilization Packaging Systems

A Multi-Generation, Family-Owned Company

It all began in 1947 when our grandfather, William F. Daly, saw an opportunity to advance lightweight food grade flexible packaging, in a market surrounded by boxed food and cans. Fast forward to the 1970's when William P. Daly, our father, changed course and heeded the call for medical grade sterilization packaging that would enhance patient safety. This is where our primary focus remains today.

We Don't Just Adhere to Industry Standards... We Help Define Them.

Through every chapter, we have remained committed to providing custom solutions that best serve our customers, and the needs of the patients and practitioners they serve. We understand and commit to the quality standards set forth in our industry, devoting significant resources to help consensus standards groups like AAMI and ASTM develop and improve them.

Our Vision Extends through the Supply Chain to the Patient. We Actively Focus on...

"Positively impacting and guiding the future of sterilization packaging and the advancement of patient safety, while continually improving upon packaging technologies, materials and quality systems."

Inspiring Women Leadership in the Medtech Industry

As a company that's owned and operated by three sisters, we are honored to represent women in our field and we are committed to supporting those who seek a bright and positive future in this industry.

All of our packaging products may be sterilized in a variety of methods, depending on the needs of the product. For more information about our products and sterilization compatibility, please visit our website at beaconconverters.com.

The Backing of Trusted, Medical-Grade Materials

We utilize the most proven and preferred materials such as DuPont™ Tyvek® to ensure quality without compromise. Available materials include:

- Breathable Sterile Barrier Packaging
- Non-Porous Packaging
- Barrier Packaging

Custom Products

Pouches
Lidding
Die Cut Inserts
Overwraps
Header Bags
Bulk Bags
Tyvek® Tie wraps
Tyvek® Lift Tabs
Flat/Square Bags
Rollstock

We Are Proud to Serve these Healthcare Industries:

- Medical Device
- Pharmaceutical
- Biologics
- Diagnostics
- Animal Health

Shining to Support You

- ✓ **Accessibility.** We connect customers with the person who is best equipped to address their questions or concerns, whether it be our customer service team, our technical team or our top management.
- ✓ **On-Time Delivery.** We consistently meet a 97% on-time delivery rate, regardless of the location or carrier.
- ✓ **Responsiveness.** We never leave our customers in the dark and always respond to their inquiries in a timely manner.
- ✓ **Lead Times for Orders/Reorders.** We truly understand the urgency of on-time delivery and have worked with timelines as tight as one day to provide the solution you need, when you need it.
- ✓ **Short Lead Times for Quotes.** Our experience enables us to provide prompt, accurate quotes. You can conveniently request a quote via our website or, if you aren't quite sure what you need, our team is always available to assist you.
- ✓ **Technical Expertise & Guidance.** From measurements to material selection, we can guide you through the entire process to help you succeed.
- ✓ **Partnership Mentality.** We provide the level of personalization that our customers truly need and appreciate. This is why a vast majority of our business comes from relationships that have exceeded 10 years, with some even approaching 40 years.
- ✓ **Communication & Quality Assurance.** We clearly communicate what is possible to achieve so you are not left wondering. Quality assurance is at the core of what we do and we consistently meet or exceed a 99% rate of complaint-free products, regardless of the product being manufactured.

Lighting the Way to More Sustainable Solutions

GOLD AWARD RECIPIENT for *Environmental & Sustainability Achievement and Technical Innovation*

We believe materials that safeguard product sterilization are valuable. That being said, we understand the importance of sustainability and proactively seek ways to reduce product footprint. Since our products are made to order and custom fit, this can naturally minimize the amount of material used.

We also prioritize resource recovery and find creative ways to utilize new, unused materials that would otherwise go to landfill. Two examples are **The Remakers Dream Catcher**, where we took our unused materials and assembled and donated over 200 Dream Catcher craft kits to children's hospitals and wellness initiatives, and **Bella the Bride**, where unused materials were transformed into wedding dress that raised awareness around material recyclability and resource recovery.
